

USER RESEARCH PORTFOLIO

Internship Task 1

Name: Sagar Kumar

Intern ID: CITS2918

Project: User Research Portfolio for an Online Shopping Platform

Objective

Study user behaviour, identify pain points, and recommend improvements for a better online shopping experience.

Research Methodology

- Survey of 100 users
- 5 User Interviews
- Usability Testing
- Competitor Analysis

User Persona

Rahul Sharma (24), Software Engineer. Goals: Fast checkout, secure payment, quick delivery. Pain points: Slow website, difficult navigation, limited payment methods.

Key Findings

80% prefer mobile shopping, 70% expect delivery within 2 days, 65% abandon carts due to delivery fees, users want better filters and faster support.

Recommendations

1. Improve page loading speed.
2. Simplify checkout to 2-3 steps.
3. Add voice search and AI recommendations.
4. Improve customer support with live chat.
5. Offer transparent delivery charges.

Conclusion

This research shows that improving usability, performance, and trust can significantly increase user satisfaction and conversion rates. The proposed recommendations focus on creating a smoother and more efficient shopping experience.
