

Internship Project Report

Topic: Usability Testing Report
Name: Sagar Kumar
Intern ID: CITS2918

1. Introduction

Usability testing evaluates how easily users interact with a software application. The goal is to identify usability issues, improve user satisfaction, and ensure an intuitive user experience.

2. Objectives

Objective	Purpose
Ease of Use	Simple navigation
Efficiency	Complete tasks quickly
Error Reduction	Reduce user mistakes
Satisfaction	Improve experience

3. Testing Methodology

Participants: 20 users
Tasks: Login, Money Transfer, Transaction History, Profile Update
Metrics: Task Completion Rate, Time Taken, Error Rate, Satisfaction Score

4. Results and Analysis

Pie Chart showing task completion distribution.

Bar Chart showing usability scores.

Line Chart showing reduction in average errors during testing.

5. Recommendations

- Improve navigation labels.
- Add onboarding tutorial.
- Reduce transaction confirmation steps.
- Increase font size for accessibility.
- Enhance loading speed.

6. Conclusion

Usability testing significantly improves user experience by identifying design issues before product launch. The findings indicate high task completion and good user satisfaction while highlighting areas for further improvement.
