

Internship Project Report

Topic: User Persona Development
Name: Sagar Kumar
Intern ID: CITS2918

1. Introduction

User Persona Development is the process of creating fictional representations of target users based on research. Personas help designers and developers build products that meet real user needs.

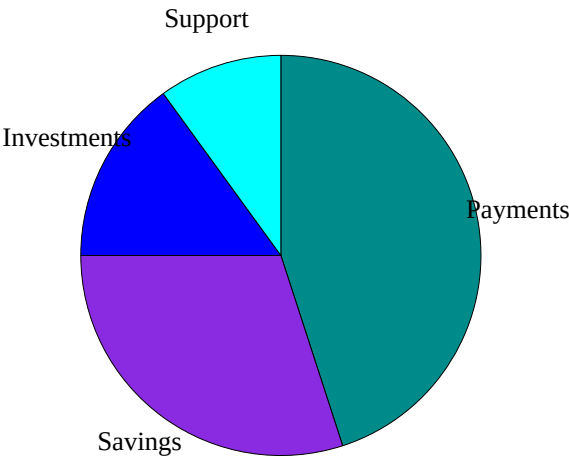

2. Objectives

Objective	Description
Understand Users	Identify user needs
Improve UX	Design intuitive interfaces
Increase Engagement	Meet user expectations
Reduce Errors	Focus on real problems

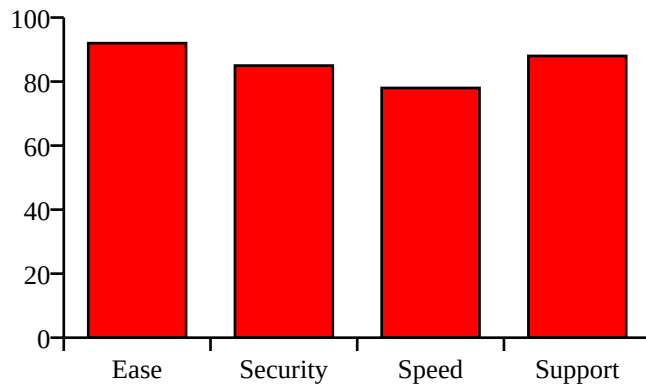

3. Sample User Persona

Name: Rahul Sharma
Age: 28
Occupation: Software Engineer
Goals: Fast and secure digital payments.
Pain Points: Complex interfaces, slow loading, security concerns.
Preferred Device: Android Smartphone.

4. Analysis Charts

Pie chart showing user priorities.

Bar chart showing user satisfaction ratings.

5. Recommendations

- Keep navigation simple.
- Use biometric login and OTP.
- Provide clear transaction history.
- Add budgeting and spending insights.
- Improve accessibility with larger fonts and better contrast.

6. Conclusion

User personas guide product teams toward user-centered design. They improve decision-making, enhance usability, and increase customer satisfaction by focusing on real user goals and behaviors.
